

National Severe Weather Warning Service

Chief Forecasters Assessment

An active frontal system will move southeastwards across the area during the second half of Thursday bringing generally 15-25 mm of rain, but perhaps as much as 40 mm over parts of west Wales. The worst of the rain should clear away southeast on Thursday evening.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **15:00 on Thu, 06th Dec 2012** until **23:55 on Thu, 06th Dec 2012**

Rain will become heavy for a time during the second half of Thursday across parts of Wales and southwest England. With the ground still being saturated following last week's heavy rain and some river levels still high, the public should be aware of the risk of localised flooding.
